DSM Printing (PDF)

1. When you Print, use "FIT TO PAGE".
This will automatically scale the PDF to the size of the paper you are using in your printer.

2. If you Print NOT using "FIT TO PAGE", some of the print will NOT always fit on the page and will appear to be lost.

3. Print in some computer programs will automatically scale and does not have "FIT TO PAGE".

4. Avoid Print scaling via % which will sometimes appear to work OK but will NOT always work.

5. Avoid Printing DUPLEX to use both sides of the paper as this will make page turns more difficult.

6. If you wish to keep multiple pages together, attach them together with transparent tape in at least 3 places (upper, middle, lower). Fewer attachments can easily come apart if one breaks.
